Title of Project: *"Let's Meet"*

Definition:

Our System provides a common platform to people to do more of what they want to do in life. It is organized around one simple idea: "when we get together and do the things that matter to us, we're at our best." And that's what our system does. It brings people together to do, explore, teach and learn the things that help them come alive.

Objectives of Project:

- Schedule meetings and automate notices to members for the same
- Openness to know about people in the same field
- Broader Network Opportunities
- People can learn new things
- Post group polls

Scope of Project:

- User will recommend communities according to his interest field.
- Users can get the information by following Speakers as well as more knowledge about the area of the field. Moreover ,speakers will have opportunities to broader their network.
- Users can get to know about seminars ,webinars and events to be organised nearby.

Feasibility:

1) Technical Feasibility
- Technical Feasibility defines whether our system technically feasible or not
- GPRS System
- Open Source Client-side Framework

2) Operational Feasibility

- Operational feasibility defines the whether all the users requirement are satisfied or not.
- We have studied our system and gathered details requirements for the system.
- We have also gathered requirements from document study and studying similar system and identified requirements:
  - ✓ Registration
  - ✓ Login
  - ✓ Google maps
  - ✓ Feedback
  - ✓ Polls

3) Economic Feasibility

- Our system can be built with minimum cost as it requires all the open sources
